RW Aliceville Named “Contractor of the Month” as Casting is Completed

RW’s Project Team for the FCI Aliceville, AL project recently received the award for “October Subcontractor of the Month” from General Contractor Caddell-Yates, Inc. The award is reflective of the company’s overall commitment to job safety, performance and progress. Also of note, RW finished erecting out the last module on October 29th. Alongside Caddell-Yates, RW produced and outfitted the cells in its on-site production facility. RW cast a total of (229) precast cell modules, which comprised (816) individual cells. Not only was this the first time RW has worked in the state of Alabama but it also marks the first time RW has worked with Caddell-Yates. RW completed the casting and erection in just over (7) months, without a lost-time incident, which enables the project to move forward ahead of schedule.
