RW Begins Casting in Yazoo City

RW's Onsite Operations Team began casting of the 888 precast modular cells for the new FBOP facility at Yazoo City, MS. Casting of the 252 pieces, both Quad and Double modules, will run through early fall. RW's precast cell modules are produced concurrently with the new facility's site and foundation work, ensuring quick, efficient building assembly and close in. The 888 cells are prefinished in the RW manufacturing facility prior to erection. This marks the 9th Federal Bureau of Prisons project for RW's team and the second consecutive working with the Yates/Caddell JV team and architect, GRW Engineers.

BEST QUALITY. BEST PRICE. BEST WAY.
